Report of School Board.

The school board having in charge the schools of the town district respectfully submit the following report :

It is with more than ordinary feelings of pleasure that we attempt to report the general condition and progress of the schools of the town. Not that as a whole, we have been entirely free from disappointment as regards school matters and results ; but that in several instances the improvement has exceeded our most sanguine expectations.

As a whole we feel justified in stating that all have been above an average under the present school system, which in our opinion far excels the old district system. Our reason for this preference is as follows : First the teachers are selected by the school board who are acquainted with the needs and requirements of each school and endeavor to procure such teachers as are adapted to each of them, and as they visit these schools from time to time, readily observe the changes to be made in order to make the school the most profitable, secure the best results, and instruct the teachers to practice the required change. Again, the board look after the school buildings and recommend as fast as reasonable to put them in such condition suitable to confine our children in for six hours in a day for twenty-six weeks, the length all our scholars have received for the past year.

TEXT BOOKS

The first trial of the free text book system commenced with the year that has passed, and we are pleased to be able to report our appreciation of the same. It will be noticed in the

financial report that the books have incurred quite an expense this year in making the required change, which in after years must be comparatively small. Under this law we have established a uniformity of text books which are necessary in order to make our schools the most profitable. Each scholar is furnished with all necessary books for his own use while under the old law where there were several scholars in the same family, in many and perhaps we might state that in the most instances, that two or even more would be required to use the same book, which is very detrimental and embarrassing to both scholar and teacher. The school board gave notice in the several schools that they would examine the books at the close of the school year and decide which school had returned their books in the best condition and make a record of it in the general report of the town. We have examined the books and find the class in penmanship, at the South Road, have made the most improvement and find the books very neatly kept. The neatness of the book-keeping blanks, at the Centre Road, are deserving of notice. The general school books we found at the Mills to be in the best condition.

SCHOOL HOUSES.

The town raised two hundred dollars for repairs of school houses the past year, which has been expended in repairing the house at the North Road. Upon examination it was found to be in the most dilapidated condition of any in town, and in consultation we thought it would be for the best to repair this house in a thorough and substantial manner which required little more than the sum raised. The next one as we rank them, will be at Smith's Corner which we would recommend repaired the coming year, thus repairing one each year in a substantial manner which is recommended by the Board, to be for the best interest of all concerned.

To Parents.—It matters not how good a condition the scholars may be in, if you have neglected to perform your high part in the education of your children, you are inexcusable.

The highest trust ever committed to you, is unquestionably the education of your offspring. You may be unable to furnish them with material goods, but you may furnish them with a liberal education, which is the safest guide to truth and virtue, and the strongest bulwark against vice and immorality. To do this, besides the many little offices you can perform at home to cheer and encourage them in the somewhat wearisome duty of continual study, your frequent presence in the school room would not be inappropriate. If you can, by your presence here lighten their labor or increase their interest, you are certainly culpable if you do not perform the duty.

The details of receipts and expenditures by the School Board will be found in the financial statement following. The details of payments by the School Board were by written orders upon the treasurer, which are all matters of permanent record in a book kept for the purpose, and open to the inspection of any citizen of the town.
